

PLANNING UNIT

Sub: Regarding the Budget Requirement of CRF for FY2021-22

Planning Unit received the minutes of CFC held on 25th June 2021. Discussed it with Head CRF and the following points were noted:

1. Regarding the request of 3.67 Cr INR under the salary head for CRF, the prevailing practice is that the planning unit reimburses the payment made by the IRD under the NPN18/01 budget head. The Dean IRD has already submitted a projected request of 2.5 Cr INR for the salary under CRF and that Planning unit would be disbursing the funds as and when requested.
2. With regards to the request for non-recurring funds to the tune of 235.75 Lac INR for the current financial year, fund is already allocated for IOE equipment, renovation, and minor new construction activities, under OH-35 (Plan) hence no scope of any further allocation.
3. No funds available for the partial support for Nano indenter and FESFM for the current FY however it can be looked upon in the next financial year.
4. Fund to the tune of 66 Lac INR is available under the Operational expenses by academic unit and central admin under the NPN18/21CF, with regards to their Non-Plan request of INR 459.3 Lac.

DIRECTOR
→ Dean (CRF) may look into this.

DDSP
2/8/2021

1. Already being met by IRD/IOE
2. Already done by IOE
3. Can be linked to IOE/Planning for replenishment from host yr IOE release.
4. May be released by IOE in anticipation of subsequent release this year.

Indian Institute of Technology Delhi
CENTRAL RESEARCH FACILITY

Minutes of Meeting of Central Facility Committee (CFC) held on 25th June 2021 at 3:30 PM online.

Members present: Prof. Ashok Ganguli (DBS&P), Prof. T.C. Kandpal (DDO), Pankaj Srivastava (Head, CRF), Ashwini Agrawal (Ex-Head, CRF), Sameer Sapra (Associate Head CRF), BhaskarMitra, Tapan K. Nayak, Suresh Neelkantam,

The following points were discussed:

1. Requests for partial support to procure and establish/upgrade three facilities

The CFC members were informed that the CRF has received three proposals for partial support to establish/upgrade three facilities. Three faculty colleagues who had submitted these proposals have already received grants/funds from external/other funding agencies to procure these facilities. However, some additional funds are requested from the CRF so that state of the art systems can be procured and installed. The proposers were requested to make brief presentations in front of the CFC to justify their proposal for additional funds. The relevant details of these three facilities are listed in the table below:

S.No.	Name of the Facility	Name of the Proposer	Funds received from external sources	Additional funds required
(i)	Nano-indenter	Prof. Sitikantha Roy	1.0 crore	36.5 Lakhs
(ii)	Additional chamber for CVD set-up	Prof. Vamsi Krishna	5.0 crores	2.0 Crores
(iii)	FESEM	Prof. Naresh Bhatnagar	1.25 crores	1.25 Crores

(i) Nano-indenter: Prof. Sitikantha Roy explained to the committee the proposed system with capability to measure such a wide bandwidth of compliance, rheological properties is very rare and is truly unique. He informed that out of the total cost of the equipment, 1 crore will come from a DHR funded project. The following optional items can be procured with the additional fund of 36.5 lakhs.

1. NanoBlitz 3D (high-speed high throughput indentations over the surface)
2. NanoBlitz 4D. (data collected through the dept)
3. User Method Development for InView Control Software. (scripting feature for controlling the indenter probe).

Prof. Sitikantha Roy also presented a list of 11 potential users of the proposed system and informed the CFC that the aforementioned optional items will be useful for all of them. He also commented that at least 3 out of the 11 users will be using these optional items extensively.

(ii) Additional chamber for CVD set-up: Prof. Vamsi Krishna informed the CFC that 5 crores have already been allocated through IoE grant to procure a CVD set-up for photovoltaic applications. He requires an additional grant of Rs. 2 crores to add another chamber in this set-up to minimize cross-contamination issue. He also informed the CFC that he was expecting financial support from an industry but did not get any due to the ongoing pandemic.

the existing Solid State NMR after upgradation can be used for carrying out long experiments. After detailed discussion, it was decided that the decision on upgradation of the existing Solid State NMR should be deferred till the installation of the new NMR, which would be capable of handling both liquid and solid samples. If a need for another NMR is indeed felt after installation of the new NMR, the CFC would discuss this matter again.

The CFC approved the proposed budget of the CRF as mentioned/listed in the Appendix.

4. Inventory Control of CRF

The CFC was informed about problems related to the CRF inventory. The committee discussed and decided that the inventory control of both the campuses should be on the name of Dr. Bhupinder Singh, who is working as a Principal Technical Officer in CRF.

5. Space Requirement of CRF

The CFC was informed that the CRF is facing a severe space crunch as it has grown significantly both in terms of equipment and man-power. There is an urgent need more space in the Hauz Khas campus. The DD (S&P) suggested to put up a formal request for the same.

The meeting ended with vote of thanks to the Chair.
