

CENTRAL RESEARCH FACILITY

Minutes of Meeting of Central Facility Committee (CFC) held on August 29, 2022 in the Board Room.

Members Present: Profs. A.K. Ganguli (DD S&P), T.R. Sreekrishnan (DDO), Sukumar Mishra (Associate Dean, R&D), Pankaj Srivastava (Head, CRF), Sameer Sapra (Associate Head CRF), Prof. Manidipa Banerjee (special invitee).

The following points were discussed:

(1) Major developments in the CRF and SATHI Project

The Head, CRF, informed the members about the major developments in CRF and SATHI in the last 4 years. The status of the purchases made under the MHRD, HEFA, and IOE grants along with their installation status were presented and discussed.

(2) Policy on user charges for new faculty

It was pointed out that some of the new faculty members find it difficult to use the CRF facilities on a payment basis as they do not have sponsored research projects and PDF. It was suggested that the Seed Grant for the new faculty be used for this purpose. However, if the faculty member wants to use the entire seed grant for procuring a specific instrument or establishing a facility, the Head of CRF may allocate a certain amount of funds in the faculty's CRF account.

(3) Rebate in user charges for DSIR certified companies

The R&D charges were decided to be implemented for DSIR certified companies.

(4) Formation of a committee to look after operations and maintenance of Advanced Electrical Characterization Laboratory (AECL)

It was discussed and approved that a committee be formed for the operations of the AECL lab. The committee will comprise of the following members: Prof. Abhisek Dixit (EE), Prof. Rajendra Singh (Physics) and Prof. Samaresh Das (CARE).

(5) To consider the proposal from Ace Green

The CFC was informed that ACE Green Recycling, a start-up located in Noida, wants to use several central facilities at subsidised rates. It was decided that the charges for such requests could be decided on a case-to-case basis by the Head and Associate Head of CRF.

(6) Inclusion of THz facility (as a shared facility) in CRF

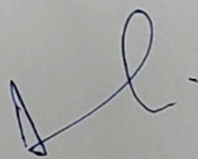

It was decided to include the THz facility in the CRF in sharing mode. It was also discussed that the Head of CRF could take the decision to include the sharing facilities in CRF and that such requests are not required to be discussed in the CFC.

(7) *Thoughts on how to operate heavily used facilities 24x7*

It was discussed to operate some of the heavily used facilities in CRF 24x7. It was pointed out that one of the major bottlenecks in running the facilities 24x7 is the lack of on-campus residential accommodation, particularly on the Sonipat campus. It was suggested to include trained PhD students to operate the instruments in one of the shifts.

The meeting ended with vote of thanks to the Chair.

(A.K. Ganguli)
Chairperson DD(S&P)
