

Minutes of the Meeting of the 19th Central Facilities Committee (CFC) held on 18.10.2022 in Senate Room

The CFC meeting was held on 18th Oct 2022. It was attended by the following members: Prof. Ambuj Sagar (Chairperson, DDSP), Prof. Sreekrishnan (DDO), Prof. Sukumar Mishra (Associate Dean R&D), Prof. C. T. Dhanya (Associate Dean Academics PG), Prof. Pankaj Srivastava (Ex-Head CRF), Prof. Bhanu Nandan, Prof. Neetu Singh, Prof. Deepak Kumar, Prof. Nitya Nand Gosvami, Prof. Sameer Sapra (Head CRF) and Prof. Manidipa Banerjee (Convenor, Associate Head CRF)

The Head welcomed the new committee members to the CFC.

The following agenda items were discussed.

1. **Equipment list:** Finalization of the list of equipment proposed for CRF. The new facilities to be created under CRF were proposed and discussed. The final list of items to be procured is attached in Annexure 1.
2. **Operations:** Smoother operations and accessibility of CRF labs.
 - a. A number of facilities in CRF were not being utilized optimally. In previous meetings of the CFC (dated 30th May 2019 & 26th June 2021) it was decided to further observe the functioning of these facilities and to switch them to sharing mode if they remain under-utilized. It was now decided that these facilities be changed from co-owned/adopted to sharing mode with immediate effect. The facilities that will be switched to sharing mode are:
 - i. Bio AFM, coordinator Prof. Bishwajit Kundu
 - ii. FACS, coordinator Prof. Archana Chugh
 - iii. ESI-LCMS, coordinator Prof. Tapan K. Chaudhuri
 - iv. MALDI, coordinator Prof. Bishwajit Kundu
 - b. The coordinators and functioning modalities of facilities owned by CRF and those housed on CRF premises, whether owned, adopted, co-owned or shared, will be decided by CRF.
 - c. The CFC felt the cell biology lab at Sonipat is not being utilized optimally. It was decided to form a committee of coordinators for its best utilization. The committee members will be Prof. James Gomes (KSBS), Prof. Neetu Singh (CBME), Prof. Shilpi Sharma (DBEB) and Prof. Amitabha Mukhopadhyay (KSBS). The committee is requested to discuss and formulate a working proposal for optimal usage of the facility preferably within two weeks.
3. **Compensation to operators:** Due to the increased operations of CRF, a number of operators are now required to work extra time. It was decided to compensate for the extra hours by introducing a "scientific help fee" to be paid to such operators on recommendation of CRF Head and Associate Head.
4. **Credit to coordinators:** Every semester, starting January 2023, CRF will credit 5000 to CFC committee members, 10,000 to coordinators of facilities owned by CRF, 15,000 to Head and Associate Head as a token of appreciation for their services offered to the CRF. This credit will not be additive, e.g. a coordinator of two facilities will get the credit only once.
5. **Trainee Scientists:** Ten trainee scientist positions to be launched with a stipend of INR 15,000 – 20,000 stipend p.m. for a maximum of six months. They will be trained to operate heavily used instruments so these can be made available 24/7.

CFC MINUTES

6. **Housing:** CFC recommended allocating five houses for CRF staff members by Competent Authority approval. This support from the institute is much required for ensuring optimal output from the staff and smooth operations of CRF.
7. **Budget:** CFC requested Dean Planning to release the balance amount (1.5 Cr) of the sanctioned budget since all NPN funds (operational costs) are now exhausted.

The meeting ended with a vote of thanks to the Chair.

Annexure 1: List of approved facilities

Prof. Ambuj Sagar 26/10/2022
Chairman CFC and DD (S&P)

Prof. Sameer Sapra 21/10/2022
Head CRF

Director (for approval)
All CFC members

✓ Head, CRF

CFC MINUTES

Annexure 1: List of approved facilities:

Name of equipment	Requirement/accessory for	Availability of space	Expected purchase process	Beneficiary academic units	Cost in INR
Preparative HPLC	Sample preparation for CRF synthesis laboratory	Yes, CRF Synthesis laboratory, Block V	GTE exemption available	Chemistry, Chem Engg, Textile, Mech Engg, DBEB	50 lakhs
Nano-indenter	Upgradation for Nano indenter	Yes, AFM laboratory	STI	Applied Mechanics, Textile, Mech Engg, Material Sc, CBME, CART	50 lakhs
Real time Ammonia and NOx measurement in Ambient Air	Ammonia and NOx measurement	Yes, to be installed in a mobile van	STI	Mech Engg, Chem Engg, Design	50 lakhs
Maker's space list: Reflow Oven Stencil Printer Pick and Place Machine PCB milling machine PCB Short Locator Laser Marking (PCB etching) UPS Desktop Computer Laptop Cooler	Makerspace	Yes, makerspace	Indian, GeM	Mech Engg, Chem Engg	40 lakhs
Cathode module exchange and servicing	Servicing of an existing LVEM5 Desktop TEM and SEM microscope	Yes	STI	Chemistry, DMSE	17.5 lakhs
Gas-tight hot and cold stage with XY positioning	Accessory for the <i>in situ</i> IR equipment available at the CRF	Yes	STI	Chemistry, DMSE, KSBS, CRDT, CBME, Physics	19 lakhs

High power blue laser system - including robot, chillers, auxiliary components	For manufacturing, joining activities and testing prototypes – projected to be the first blue laser system in India; also required for UG teaching	Yes	GTE, STI	Mech Engg, Materials	197 lakhs
Polishing machine	For polishing lenses	Yes, IDDC	Dr Gufran has confirmed with vendor	SeNSE, Mech Engg, Physics, OPC, EE, Textile,	75 lakhs
Multiphoton laser attachment	To prevent cellular toxicity during imaging, accessory for existing Zeiss microscopes (Elyra and CD7) at Sonipat campus	Yes, in Sonipat	GTE exemption and proprietary certificate available	KSBS, DBEB CBME, Chemistry	100 lakhs
Odyssey DLx imaging system (infra-red scanner)	For protein, DNA, RNA and cell-based assays	In CRF facility 5 th block, small footprint	STI	KSBS, DBEB CBME, Chemistry	45 lakhs
Photovoltaic EQE (IPCE) and IQE measurement setup	Upgradation of existing CRF equipment	Yes, Sonipat PV lab	GTE, STI	DESE, Chemistry, DMSE, EE, CARE	100 lakhs
Portable FTIR spectrometer	Accessory for synthesis lab to measure IR spectra	Yes, CRF Synthesis laboratory, Block V	GTE, STI	Chemistry, Chemical, Textile, Mechanical, DBEB, KSBS, Atmospheric Sciences	20 lakhs
UV-Vis-NIR Spectroscopy with integrating sphere	Accessory for existing equipment	Yes, CRF Characterization laboratory, Block V	GTE, Establishing MoU with Perkin Elmer	DMSE, Physics, DESE, Chemistry, KSBS,	70 lakhs
BSL3 facility with bench space, autoclaves, centrifuges, freezers	For work with Biosafety level 3 organisms	200 sq ft near CRDT already allocated and available	All material will be purchased through GeM	CBME, KSBS, DBEB, CARE, Civil Engg	250 lakhs
