

Minutes of Meeting of Central Facility Committee (CFC) held on 8th November, 2018 at 10:30 am in IRD Conference Hall

Members present: Prof. M Balakrishnan (DDS&P), Prof. B. R. Mehta (Dean R & D), Sameer Sapra (Assoc. Head, CRF), Amit Gupta, Manidipa Banerjee, Ashwini Agrawal (Ex Head, CRF) and Pankaj Srivastava (Head, CRF)

1. All proposals presented in the last meeting of 30th October were discussed individually. Based on the deliberations of the last meeting and views expressed by the CFC members, the purchase of the following equipment from the HEFA funds was approved. It was decided to initiate purchase process for the same.

S. No.	Instrument Name	Estimated Price (INR)	Proposer
1.	Cryo-Probe for 500 MHz NMR	2.8 Crores	Prof. S.Nagendran
2.	Electron Paramagnetic Resonance (EPR)	4.0 Crores	Dr. Sayantan Paria
3.	High Resolution Digital Holographic Microscope	40 Lakhs	Prof. Kedar Khare
4.	BET Surface Analyzer*	80 Lakhs	Prof. Sreedevi

* It was approved in the last survey but was not included in the minutes of the CFC meeting.

2. Following decisions were taken for the remaining proposals:

(i) Circular Dichroism Spectrometer (Combined with stop flow kinetics)

It was decided to request the proposers to submit a comparison of the proposed system with the similar systems existing in IITD and a list of potential users.

(ii) Malvern's Nanosight NS300

It was remarked that a more generic name of the equipment/facility should be suggested. Also, more information about the equipment to be provided.

(iii) Electrical Characterisation setup

It was decided to request the proposers to provide a list of potential users and similarity/dissimilarity with the PPMS for which a purchase order has been placed.

(iv) Centralized Radioactive Isotope Handling Laboratory

It was decided to request the proposers to provide more information about the facility and list of probable users.

(v) HPLC - QTOF MS

It was decided not to approve purchase of this system as similar system exists in our Institute. It was decided to request the proposers to make attempts to revive the existing system.

(vi) MRI Facility

It was decided not to approve establishment of this facility as the number of users are likely to be less. Also, it was suggested that the interested faculty may carry out their research activities with an established hospital/laboratory of NCR.

(vii) Facility to characterize disease causing proteins

It was decided not to approve establishment of this facility as the potential users are only from a particular discipline and it is not a facility for general use.

(viii) Solid State NMR

It was decided not to approve procurement of this equipment as the facility exists in the Institute and is operational. The coordinator of the existing equipment agreed to look into the issues regarding data quality.

It was decided that clarification/information will be sought from the proposers of equipment/facilities listed from (i) to (iv). The same will be discussed in the next CFC so that a final decision can be taken on the procurement/establishment of these equipment/facilities.

The meeting ended with vote of thanks to the Chair.
